

# TERRA INCOGNITA STAGE PLOT

## TERRA INCOGNITA STAGE PLOT

### Elements presented provided by the company:

- 5x Podest 200x 100 cm (different heights)
- Costume made legs for a total of 9 podest
- 3x sails
- ropes and pulleys for rigging.

### Elements required from the venue:

- 4x Nivtec Bühnenelement 2x1m (i will need to know the thickness of the legs to make sure our costume made legs will fit the podest)

### OBSERVATIONS:

The ideal total depth required for the stage is at least 11m from the first row of the audience to the back wall of the room. We will need to use the added stage to ensure max depth.

The podests that we use during the performance have wheels that generate static charge if used on top of a dance carpet, therefore it would be ideal if the floor is left without dance carpet.
